A9 adScreenLED

Move it:

- The adScreenLED can be towed or shipped to any location by a common carrier
- adScreenLED can go on any surface! Curbside? Rough terrain? Adjust with no problem with the four corner leveling points
- Can be lifted onto a stage with a forklift
- Sets up and tear down time in under 15 Minutes

Dress it up:

- Trailer tongue is removable to give a clean, finished look
- The side skirts fold down to give a clean, finished look
- White powder coated; add your logo with vinyl wrapping to add more impact to your message!

External controls to fit your event:

- An external control box allows you to monitor and maintain your event away from the screen, allowing control of all of the power of the screen, in a portable compact case.
- The case includes everything you need to run the screen and more.
- Computer with Monitor/Keyboard/Mouse: Used to Control the LED screen and is the heart and soul of the entire system. It allows for all media playback and functionality to show right to the screen!
- Video/TV: Expands your playback options to include TV signals and allows external video devices such as DVD players and Video cameras to playback LIVE on the screen!
- DVD Player: Used to play DVD's live at an event. Don't be limited to files on USB sticks and SD media!
- Mackie 402 audio mixer: Mix and send audio from many different sources!
- Video Splitter and switcher: Take up to 4 feeds of video input from different sources and display them on the LCD monitor!
- Powered speaker control: Connect to the two powered Mackie 350 speakers that hang on the LED screen. Mix the audio for the perfect sound from the Mackie 402 mixer!
- Wireless Microphone: Our professional microphones break through the sound clearly and with precision.
- Optional Wireless Video: With our transmitter/receiver combo, you can walk through the crowd with a camcorder or just broadcast video from another location and transmit it wirelessly to the computer!
